## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/5/2008 has been entered.

### ***Response to Amendment***

2. Applicant's Amendment submitted with the RCE on 5/5/2008 amended claims 1, 8, 20, 21, 28, 35, 38-41, and 60, canceled claims 34, 48, and 50, and argued for the allowability of the amended claims. The argument was found persuasive, and since no new art having been found, the application is herein allowed, for reasons given below, with an Examiner's Amendment, next.

### ***Examiner's Amendment***

3. An examiner's amendment to the record appears below.

**In the Abstract:**

In line 2, after "medical test and", insert --, **after making a threshold determination whether the medical test result will initially be automatically interpreted by the computer system independent of clinician input**, --.

Should these changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

**In the Claims:**

Authorization for this examiner's amendment to the claims was given in a telephone interview with John S. Golian on September 2, 2008.

In line 1 of **claim 41**, replace "containing" with **--storing--**.

In line 1 of **claim 49**, change the dependency from "claim 48" to **--claim 41--**.

***Allowable Subject Matter***

4. Claims 1-33, 35-47, and allowed. The following is an examiner's statement of reasons for allowance:
5. Amended independent claims 1 and 41 are allowed because now it recites a computer system making a threshold determination whether a medical test result will be initially automatically interpreted by said computer system, to provide a plain-language

explanation thereof to the patient, independent of any clinician input, or whether said test result will be first interpreted using clinician input without such an initial automatic interpretation by the computer system.

The closest prior art of record, Binsted *et al.*, automatically generates the plain-language explanation of medical test results, before any clinician input is made.

Dependent claims 2-6, 8-20, 42-46, 49, and 51-60 are allowed because they further limit independent claims 1 or 41, or their parent claim(s).

6. Amended independent claim 21 is allowed because now it recites a computer system that determines whether a medical test result is a normal test result appropriate for a plain-language explanation thereof being automatically delivered directly to the patient by the computer system, or an abnormal test result inappropriate for such automated delivery, in which latter case the system outputs an abnormal indication to a clinician for manual delivery of the test results to the patient.

The closest prior art, Binsted *et al.*, automatically produces a plain-language explanation, without first checking whether the test result is normal or abnormal.

Dependent claims 22-26, 28-33, and 35-40 are allowed because they further limit independent claim 21 or their parent claim(s).

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
